- 1. Open the cover plate of the back panel.
- 2. Long press the reset button until the voice prompt "Please enter initialization password".
- 3. Release the reset button, and then enter "000#".

4.APP Operation

4.1.Download

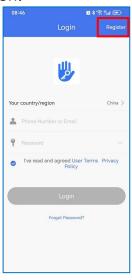

The software (iOS version) can be downloaded from the app store, and the Android version can be downloaded from the application store of Google play.

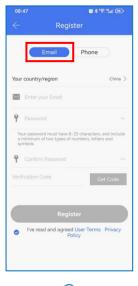

4.2.Registration

- 1. please scan the QR code to download the app.
- 2. You can also search for TTLock in the APP store(Google Play)to download.
- 3. Register a new account (phone number or email) or login with an existing account.

TTlock users can register the account by mobile phone and Email which currently support 200 countries and regions on the world. The verification code will be sent to user's mobile phone or email, and the registration will be successful after the verification.

1

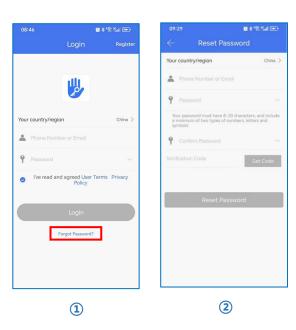

4.3.Login

If you already have an account, choose "Register with Existing Account" and enter the log in page.

- 1. The system will automatically locate the current country/region you are in. Or you can choose the country/region by yourself.
- 2. Enter mobile number/email and password.

If you forget your account password, you can click on "Forgot Password" to reset it, then log in to the app using the new password.

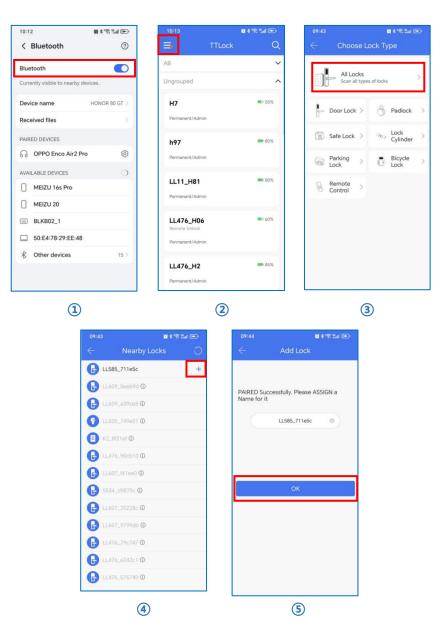

4.4.Add locks

- 1. Open the mobile Bluetooth.
- 2. In the TTLock APP, click "+ Add Lock" "All Locks".
- 3. Touch the lock screen to light.
- 4. The lock nearby will appear on the phone screen, click "+".
- 5. Re-name the lock.
- 6. The lock added successfully.

TTLock supports multiple types of lock devices. The lock needs to be added by the app after entering the add mode. Generally, a lock that has not been added, as long as the lock keyboard is touched, it will enter the add mode. For a lock that has already been added, it needs to be initialized before it can be added again. The default password is 123456 if not added by the phone.

Note: If the lock cannot be added in the above steps, please close the mobile app and Bluetooth, reopen the app and Bluetooth, and repeat the steps to add the lock.

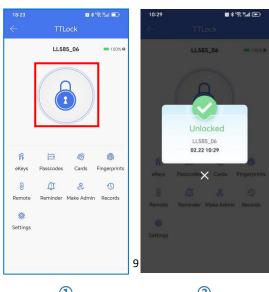

4.5.Bluetooth Unlock

Make sure there is no problem with Bluetooth communication. After connecting the phone to the door lock as above, Click a "to unlock."

Note: the phone is within 5meters from the door lock and there should be no walls or other obstacles in between.

4.6. Setting Passcode

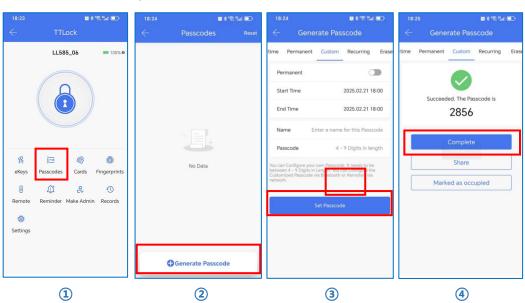

Passcodes are also a way to unlock. After entering the passcode on the locked keyboard, press the unlock button in the lower right corner to unlock. Passcodes are divided into permanent, time-limited, one-time, permanent, recurring, custom and erase passcodes. You can share the Passcode to other user via WeChat、SMS、Email、Messenger、WhatsApp.

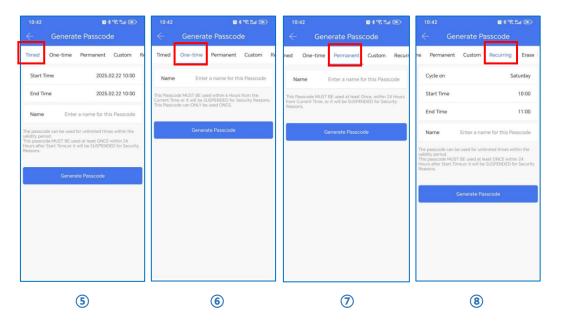

Note:

The time-limited passcode can be used for unlimited times within the validity period. This passcode must be used at least once within 24 hours after Start time, or it will be suspended for security reasons.

- 2.The one-time passcode must be used within 6 hours from the current time or it will be suspended for security reasons. This passcode can only be used once.
- 3.This permanent passcode must be used at least Once, within 24 hours from current time, or it will be suspended for security reasons.
- 4.You can configure your own passcode. It needs to be between 4 9 Digits in Length. You can configure the customized passcode via Bluetooth or remotely via network.
- 5.The recurring passcode can be used for unlimited times within the validity period.

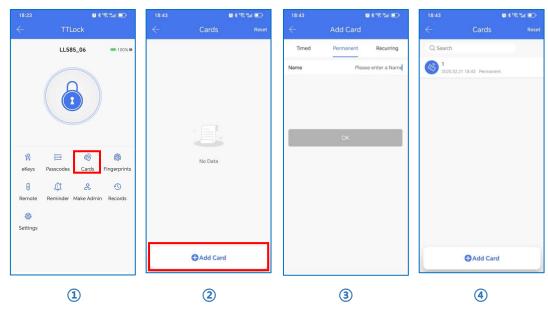

This passcode MUST BE used at least ONCE within 24 Hours after Start Timeor it will be SUSPENDED for Security Reasons.

4.7.Add card

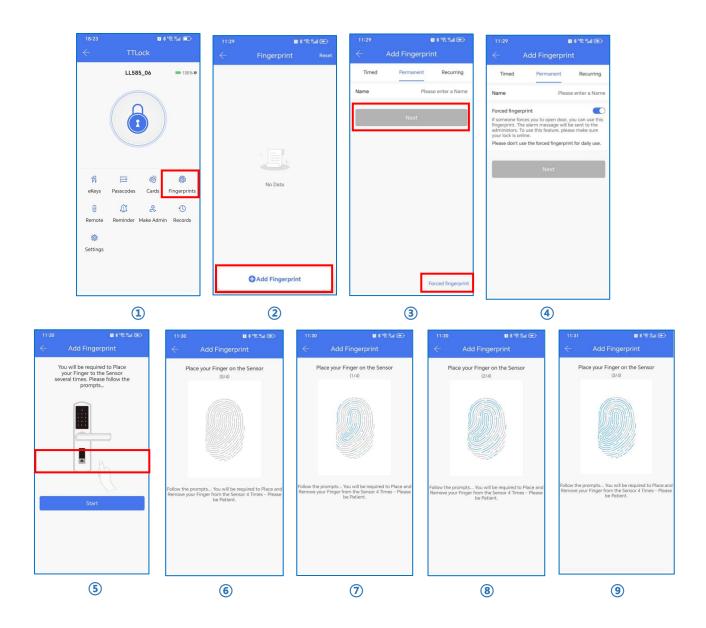

Supports opening doors through various IC cards. Before an IC card is used to ope n the door, it needs to be added first. The adding process needs to be performed by the app beside the lock. The validity period of the IC can be set, it can be permanent, timed or recurring.

4.8.Add fingerprint (option)

The premise that a fingerprint can be used to open a door is that it needs to be added first. The adding process needs to be performed by the APP beside the lock. The fingerprint expiration data can be set, it can be permanent, timed or recurring. After setting ,you can modify its validity period.

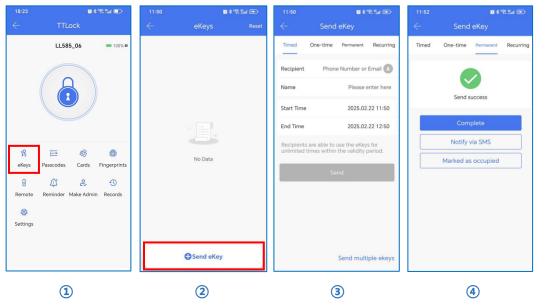

If someone forces you to open door, you can use this forced fingerprint. The alarm message will be sent to the administors. To use this feature, please make sure your lock is online. Please don't use the forced fingerprint for daily use.

4.9.Send eKeys

Click on the "eKeys" as shown in figure, you can send the eKey to other users of TTlock to authorize the unlock(the receiver must be download the APP and set up an account) → Select e-key format (Timed, permanent, One-time, Recurring) → Enter recipient's account of TTlock, set the name and effective time of the eKey, Can choose to allow remote unlocking or disallowing, authorized administrator or not authorized, as shown in figure →Send→The recipient's account has Bluetooth unlock permission.

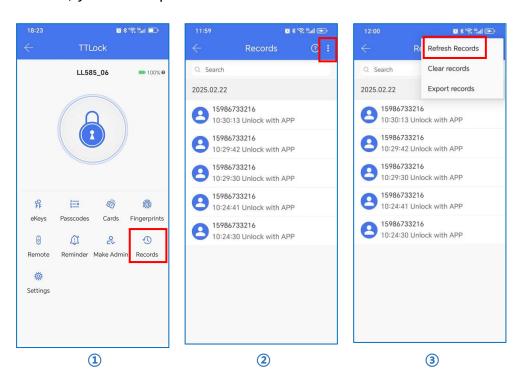

The eKeys manager can delete ekey, reset ekey, send and adjust the ekey, meanwhile he can search the lock record.

4.10.Unlock records

Click "Records "you can query your unlock record as shown in figure. Cannot see the operation records possible reasons:

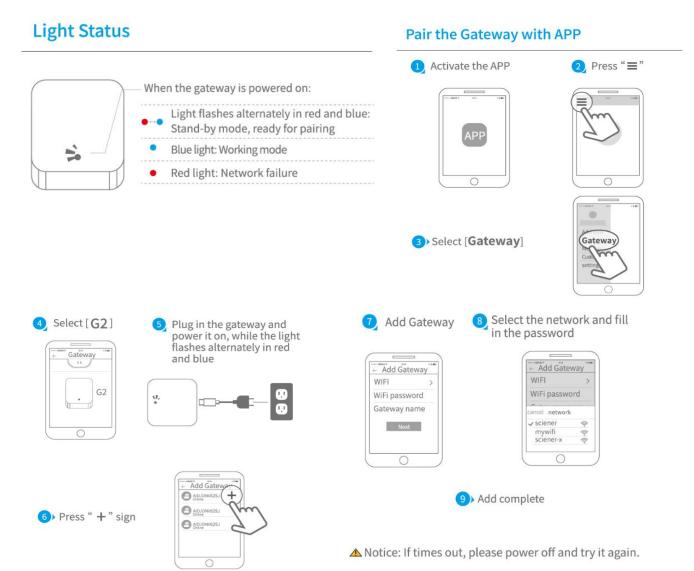

- 1.The lock is not connected to the internet, so the records of passcode card, fingerprint, and other door opening methods cannot be uploaded in real-time.
- 2.Only a certain period of records can be retained. If you need to keep the historical records, you can export the them.

5. Gateway (Optional)

The TT lock is directly connected via Bluetooth, that is why it is not attacked by the network. The gateway is a bridge between smart locks and home WIFI networks. Through the gateway, the user can remotely view and calibrate the lock clock, read the unlock record. Meanwhile, it can remotely delete and modify the password.

5.1 Add Gateway

5.2 Manual

After a short period of time, you can see which locks are in their coverage in the app. Once the lock is bound to the gateway, the lock can be managed through the gateway.

6. FAQ

1.How to read operation records?	In the Records of the main interface.
2.Why can't I unlock it after open the passage mode?	You need to perform an unlock verification in any method, than the passage mode will take effect.
